SUMMARY

Computer Science undergraduate building web and mobile applications, AI tools, and Linux utilities using APIs, databases, and background processing. Seeking software development or AI internships.

EXPERIENCE

Summer Intern - Advanced Robotics | Jun 2026

IEEE Sensors Council Kerala Chapter and Luminar Technolab, Kochi

- Completed a two-week advanced robotics internship covering sensor systems, hardware integration, and applied robotics fundamentals.

PROJECTS

PageRadar | Next.js, NestJS, PostgreSQL, Redis

- Developed a webpage monitoring application with scheduled checks, change classification, before-and-after evidence, and in-app alerts.
- Implemented durable job records, BullMQ workers, retries, and duplicate-check prevention to support reliable background processing and optional email alerts.

EtlabPro | Flutter, FastAPI, Supabase

- Developed a student app that synchronizes ETLAB attendance, marks, semester results, and timetables into normalized storage for academic dashboards.
- Implemented JWT authentication, secure mobile storage, and cached state; containerized the backend for self-hosting.

Reverse Escape Mind Wars | TypeScript, Three.js, Socket.IO

- Built a real-time multiplayer strategy game with a 3D editor for 8 × 8 escape rooms and a planning agent using A* search under partial observation.
- Validated room solvability with server-side breadth-first search and enforced a 30-point construction budget, movement rules, and competitive scoring.

Flexy | Next.js, Python, PostgreSQL, Redis

- Developed a Linux package inspection and repackaging prototype with archive validation, dependency checks, and a resource-limited WASI worker supporting one exact demo recipe.

EDUCATION

B.Tech in Computer Science | 2024 - 2028

Sahrdaya College of Engineering & Technology, Kerala

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Dart, C, C++, SQL, PL/SQL
Web and Mobile: React, Next.js, NestJS, FastAPI, Flutter, HTML5, CSS3, REST, GraphQL
Data and Tools: PostgreSQL, Supabase, Prisma, Redis, BullMQ, Docker, Linux, Git
AI and Core CS: Ollama, local LLMs, data structures and algorithms, DBMS, operating systems

CERTIFICATIONS

Full Stack Development (MERN) - ICT Academy Kerala
MATLAB for Machine Learning & Deep Learning - IEEE/MathWorks
C & C++ Programming; RDBMS PostgreSQL - Spoken Tutorial, IIT Bombay
Generative AI Workshop - IEEE Sahrdaya SB and UST
Digital 101 (Gold) - NASSCOM FutureSkills Prime

ACHIEVEMENTS AND ACTIVITIES

- Earned two Best Project awards: S1 for RyMeds and S3 for ETLab+; received a TinkerHub scholarship.
- Completed Wadhwani Foundation Ignite India; participated in Beach Hack Season 7.
